## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, drawn to a semiconductor device, classified in class 257, subclass 79+ (N.B.: claim 2 merely recited that the device defined by claim 1 has to be made without further limiting the making of fabrication).
  - II. Claims 3-13, drawn to a method of fabricating a semiconductor device, classified in class 438, subclass 22+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed (claim 1) can be made by another and materially different process than the process of claims 3-4, for instance by replacing the step of applying laser light by a step of applying heat or incoherent electromagnetic radiation. The product as claimed (claim 1) can be made by another and materially different step from the process recited in claim 5, for instance by a fabrication method based on a liquid solution containing atomic nitrogen. Finally, the product as claimed (claim 1) can be made by another and materially different process

than the process of claims 6-13, for instance by supplying the second material at a different abundance locally but while supplying the first material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johannes P. Mondt whose telephone number is 571-272-1919. The examiner can normally be reached on 8:00 - 18:00.
